HO THI KIM

FRONTEND DEVELOPER

A proactive developer dedicated to delivering impactful results from day one. I focus on optimizing user experiences and solving complex technical problems to drive project success. My goal is to enhance product quality through high-performance interfaces while consistently meeting business requirements and strict deadlines.

- Teamwork
- Problem Solving
- Presentation
- Communication

Activity

Lan toa yeu thuong Sep 2024

Raising more than 6 million VND to support a person with a birth defect

Language

- English
- Vietnamese

Experience

PnBook – Social Media Platform

ReactJS | TypeScript | Tailwind Dec 2025 - Jan 2026

- Developed core social features (Registration, Friend Requests) with real-time UI updates
- Built "Friend Suggestions" interface using Shadcn UI for a modern, high-performance UX
- Optimized workflow using Prisma for type-safe data fetching and Docker for environment consistency

Internship - Frontend Developer

Hodfords Company Jun 2025 – Aug 2025

- Resolved 20+ UI/UX bugs, ensuring seamless responsive design and cross-browser compatibility
- Optimized performance and collaborated with the Backend team to refine RESTful API integration and data flow
- Analyzed and processed datasets for AI model training, demonstrating a solid understanding of data structures and logic

Student Tracking Management System

Html | Css | ReactJS | SQL Apr 2025 - Jun 2025

- Developed a comprehensive web dashboard to monitor student academic progress and real-time class data
- Implemented core features for goal-setting and automated data reporting for teachers
- Connected Frontend with Backend via RESTful APIs to ensure fast and accurate data retrieval
